---

## Summary:

Hi, I'm Md. Rakibul Islam has a strong web development background and a passion for creating user-friendly and visually appealing websites. I have experience in HTML, CSS, JavaScript, and various front-end frameworks like React.js. I can make responsive, dynamic, and interactive web applications with React.js, Node.js, Express.js, and MongoDB.

## Skills:

HTML | CSS | Bootstrap | Tailwind | Daisy UI | JavaScript | ES6 | React.js | Firebase | Rest APIs | VS Code | GitHub | Figma | Netlify | Vercel | NPM | Axios | TanStack | Font Awesome | JWT | Express.js | MongoDB | Node.js

## Projects:

### 1. FIGHT CLUB, Martial Arts summer camp school website: [Live Website](#) | [Client Side](#) | [Server Side](#)

\* FIGHT CLUB is a web application with an Admin, Instructor, and Student dashboard.

- After signing in, users can access the student dashboard and enroll in any class.
- If a user is made an instructor by an admin, then, an instructor can access the instructor dashboard and post any class.
- An administrator can access the admin dashboard and the administrator can approve or deny any class and send feedback to the instructors. An administrator can make a user an instructor or admin.

❖ **Technologies:** HTML, CSS, Tailwind, React.js, Firebase, MongoDB, Express.js.

### 2. LITTLE CARS, Toy car website for kids: [Live Website](#) | [Client Side](#) | [Server Side](#)

\* LITTLE CARS is a toy car web application platform for kids.

- After signing in, users can view the Add A Toy page and post a toy.
- Users can leave a review about us in the customer review section on the homepage.
- When going to All Toys Route, users can see all toys and view the product details by clicking the View Details button.
- If the user visits the My Toys page, the user can only see his own added toys in descending or ascending order, and the user can edit and delete toys.

❖ **Technologies:** HTML, CSS, Tailwind, React.js, Firebase, MongoDB, Express.js.

### 3. Recipe Haven, Chef, and Recipe Platform Website: [Live Website](#) | [Client Side](#) | [Server Side](#)

\* Recipe Haven is a chef and recipe web application for exploring recipes.

- Anyone can see a chef, some recipes, and a recipe book without sign-in.
- After signing in, the user can see the chef's profile and his recipes by clicking the View Recipe button.
- User can add a recipe to the favorite list by clicking the favorite button.

❖ **Technologies:** HTML, CSS, Bootstrap, React.js, Firebase, MongoDB, Express.js.

## Education:
